

About GB7BB – Banff and Buchan

Welcome to the Web page for the GB7BB Banff and Buchan DMR Repeater.

Thanks to Nigel MM0BUH for his work in applying for the NOV for this new repeater and the work in finally getting it fully operational and on-air for 2nd January 2018.

GB7BB uses the same frequency and colour code as GB7EE so if you wanted to add this to your codeplug the easiest option would be to create a New Zone, and then copy and paste the GB7EE channels into, create new channels and copy and paste the GB7EE ones on top and then rename them then go back into the new GB7BB zone and edit the channels to be the new GB7BB ones. If you get stuck simply ask for help.

REPEATER SLOT INFORMATION

SLOT 1

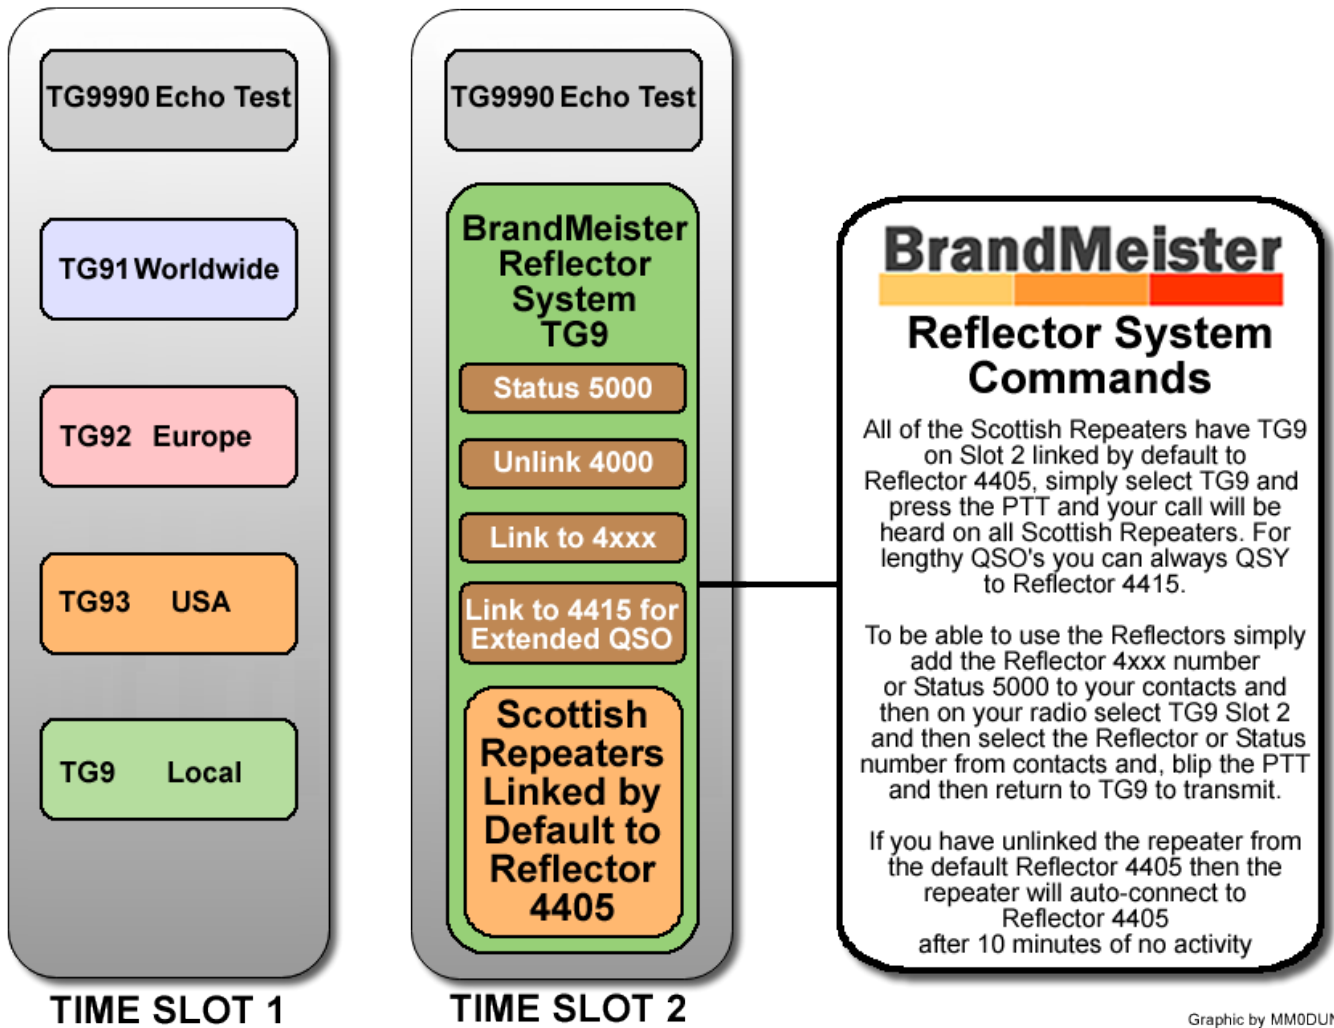

TG9 - Local QSO's does not go out over internet
TG91 - World-Wide
TG92 - Europe
TG93 - USA

SLOT 2

TG9 - Brandmeister Network, Default Reflector is 4405

11/02/2018 - IMPORTANT INFORMATION

All modes are internet connected at most times using a Eutelsat connection on a community network. At peak times (17:00 to 23:00 UTC) the capacity may be reduced and GB7BB will then function as a stand alone repeater until service is restored.
