

MMDVM in Windows

MMDVM in Windows (work-in-progress)

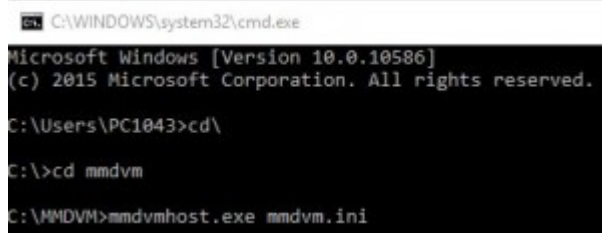

To run MMDVM in Windows you may need to install Visual Studio, this can be accessed [HERE](https://www.visualstudio.com/en-us/downloads/download-visual-studio-vs.aspx) (https://www.visualstudio.com/en-us/downloads/download-visual-studio-vs.aspx) by clicking

You will be best placing the MMDVM Host directory straight off the root of your C Drive.

Then copy the appropriate MMDVMHost.exe file from the structure into the root of the MMDVM folder.

You then need to edit the MMDVM.ini file which is located in the MMDVM directory.

The program is run by opening a MS Dos Command Prompt Window and typing in C:\mmdvdm\mmdvmhost.exe mmdvm.ini

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows [Version 10.0.10586]
(c) 2015 Microsoft Corporation. All rights reserved.

C:\Users\PC1043>cd\

C:\>cd mmdvm

C:\MMDVM>mmdvmhost.exe mmdvm.ini
```
